Parking Mayhem!

A top issue from your survey is that there are not enough parking spaces in Warwick. Parking is poorly policed. Some of our roads are blocked by cars during the day and there is not enough parking for residents at night. Parking in Warwick is set to change under new proposals for the Council to take on responsibility for parking in the district.

We spoke to Lib-Dem councillor Bill Gifford who is a member of the council parking group. "Proposals will include, on street parking meters, residents parking schemes and council parking wardens. I will not agree to any scheme until I am confident it will benefit all sections of our community - residents, commuters, businesses and visitors to the town." Bill commented.

The scheme will include short term parking in the centre with longer term parking further out

The Warwick focus group supported a recent campaign that successfully introduced day time parking restrictions in the Mallory Drive area.

We want to know what parking problems you have.

- Do you find it difficult to park in your own road?
- Is your road used as a car park for people working in the town or visiting the hospital during the day?
- Does careless parking block your road or create blind spots?
